

Australian Turntable Company

# Truck Turntables

**The Australian Turntable Company is the industry leader in commercial truck and freight turntable solutions, our consultants work with you to provide cost effective commercial vehicle solutions for your business.**

All Australian Turntable Company's truck turntables have been able to provide an excellent return on investment resulting in space saving in the loading dock, whereby lettable space within a development is increased, and significantly reduced truck loading and unloading times. With short payback periods and an ability to make future contributions to an organisation's profits, ATC's clients have been enjoying the commercial and safety benefits of these traffic management solutions for the past 25 years.

[www.turntables.com.au](http://www.turntables.com.au)

Using the latest 3D software interfacing and laser cutting technology, we can custom design and manufacture a range of truck turntable solutions from small transport up to large trucks.

With heavy emphasis on maximising lettable space, ATC works with architects, builders and developers ensuring that truck turntable solutions can be incorporated from new building plans or retrofitted to existing buildings. Built to a quality management standard ISO9001:2008, our turntables can be easily aligned with existing freight docking facilities, have full safety system options and require minimal maintenance.

For further information contact the Australian Turntable Company and find out how we can provide cost effective solutions for your truck turntable needs.
